# SUZHONG CONSULTING

Suzhong Consulting was founded in 2014 by Susanne Schutz. The company was born out of Susanne's awareness of the need for a more professionally based Feng Shui consulting service. Suzhong Consulting bridges the gap between local Chinese speaking Feng Shui masters who rarely explain their practices and procedures, and non Chinese speaking, cosmopolitan clients who require a deeper understanding and rationale for the remedies presented.

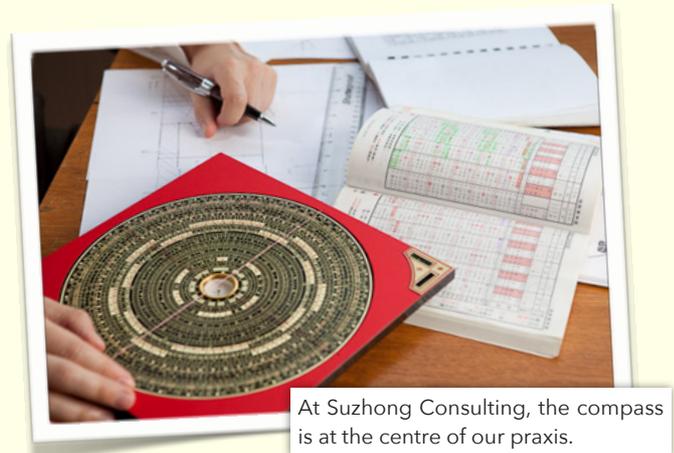

## The Value of Feng Shui

Classical Feng Shui methods and their practical applications are based on very sophisticated calculations. For residential properties, Classical Feng Shui focus mainly on remedies for key areas of the house, such as the main door, the bedroom, the kitchen and the study room. In an office or commercial context, the focus is on the offices of the CEO and senior managers, the main door, and the reception area. In all cases, the goal is to re-orientate the space in order to tap into the most beneficial Qi available. When practiced and applied correctly, Feng Shui is an excellent tool to facilitate success in daily life, create a healthy environment in which all occupants of a house or a company can thrive, and bring forth beneficial career opportunities.

## Professional Feng Shui Services

We are committed to utilizing the ancient art of Classical Feng Shui to aid companies and families to achieve success in their life goals. We make use of traditional methods and original concepts to analyze landforms and Qi patterns and provide our clients with detailed audits which will set them on the path to better health, relationships and increased wealth. We pride ourselves on being the only Feng Shui service in Hong Kong which provides detailed audits and post audit reports of commercial and residential properties in both English and German.

At Suzhong Consulting, the compass is at the centre of our praxis.

## Feng Shui Assessments

We work closely with our clients to fully understand their specific issues and needs before then advising them on the appropriate Feng Shui-based remedies. We provide a wide range of assessment services, including:

- Residential
- Commercial and Corporate offices
- Factories
- Pre-purchase, Pre-relocation and Pre-renovation
- Land selection
- Annual audit

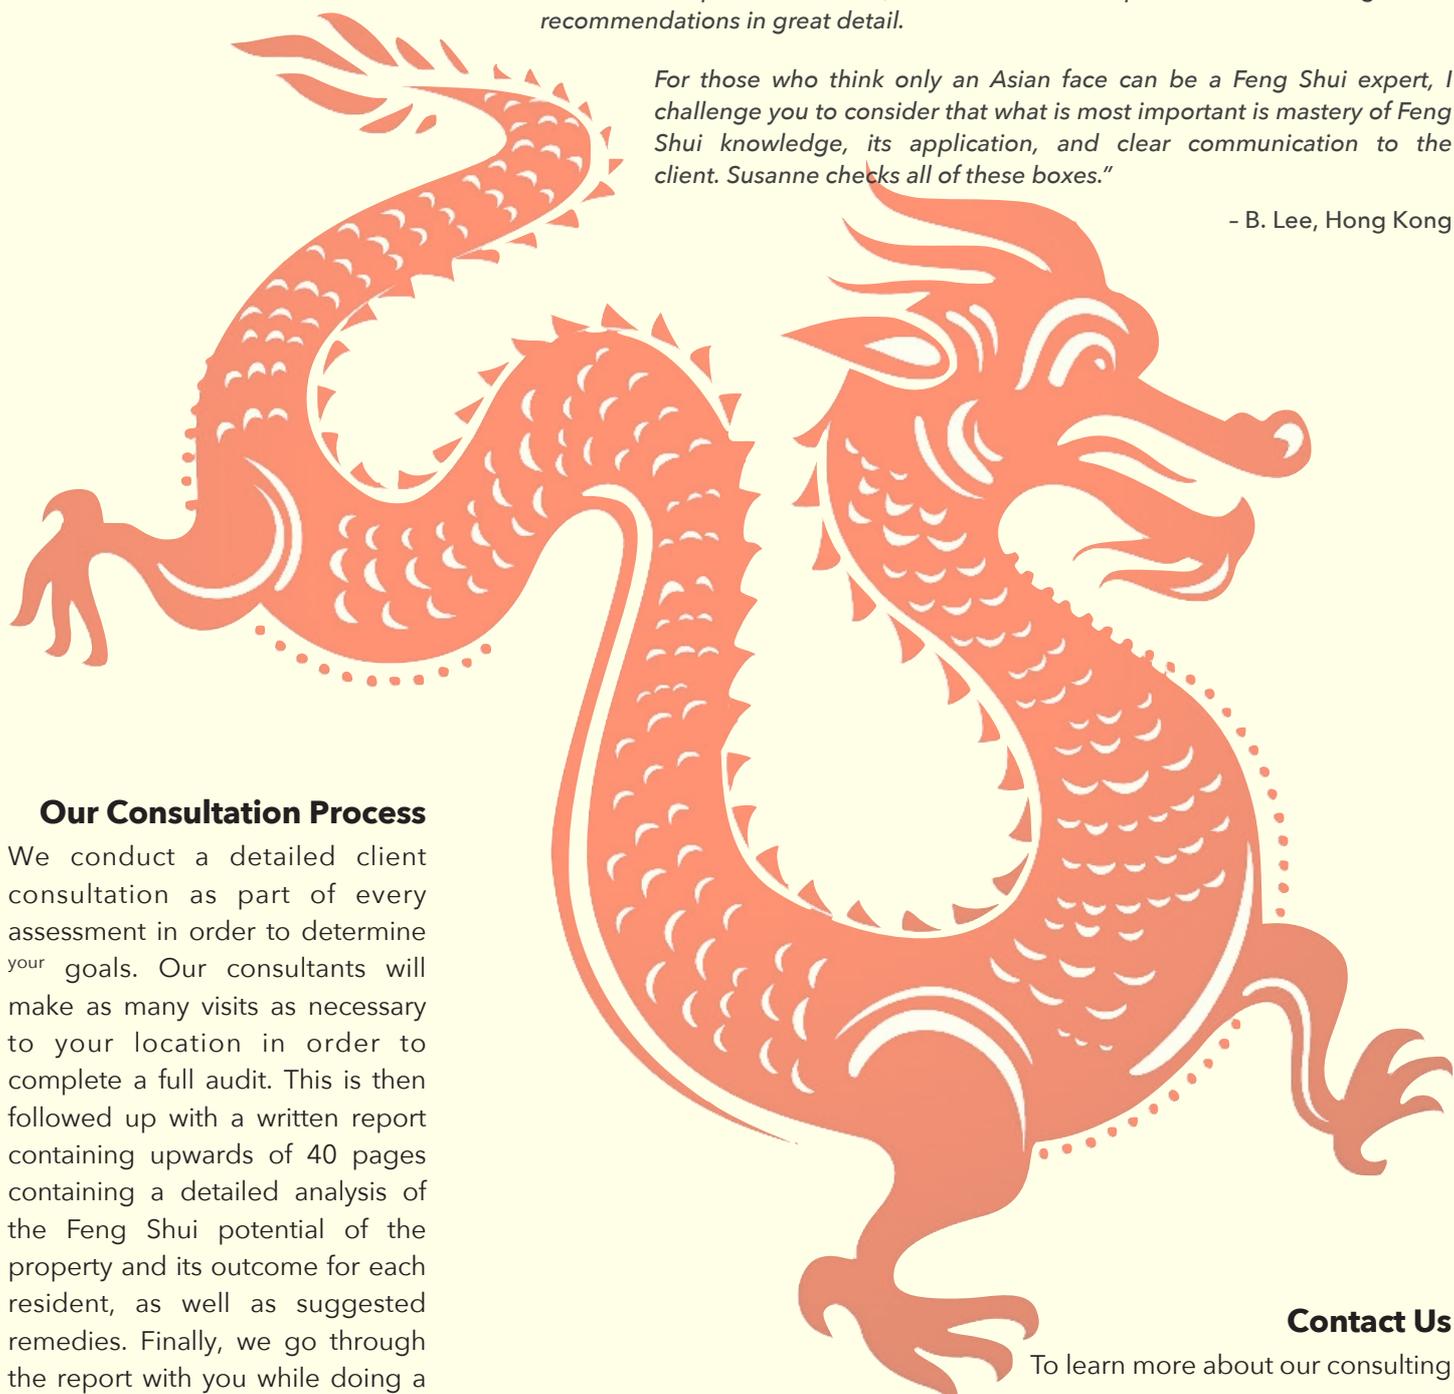

## Classical Feng Shui

Classical Feng Shui is very different from the Western variety, which is frequently a simplified, watered down version which suits Western perceptions of what Feng Shui really is. Susanne was trained personally by renowned Feng Shui Master Joey Yap and graduated with honors from the Mastery Academy of Chinese Metaphysics in Kuala Lumpur, Malaysia.

*"I chose Susanne because of her professionalism and rigorous training with a well-respected Feng Shui master. I especially appreciated her in-depth written report and follow-up consultation, in which she explained her findings and recommendations in great detail.*

*For those who think only an Asian face can be a Feng Shui expert, I challenge you to consider that what is most important is mastery of Feng Shui knowledge, its application, and clear communication to the client. Susanne checks all of these boxes."*

- B. Lee, Hong Kong

### Our Consultation Process

We conduct a detailed client consultation as part of every assessment in order to determine your goals. Our consultants will make as many visits as necessary to your location in order to complete a full audit. This is then followed up with a written report containing upwards of 40 pages containing a detailed analysis of the Feng Shui potential of the property and its outcome for each resident, as well as suggested remedies. Finally, we go through the report with you while doing a 'walk through' during which we explain the contents of the report as well as the suggested remedies and reasoning behind them.

### Contact Us
